609.250.5135 | ramachandran.abhiram@gmail.com | github.com/theabhiramr | linkedin.com/in/theabhiramr | theabhiramr.com

Computer Science honors student at Drexel University with full-stack development, agentic AI and embedded systems experience across production and user-facing applications. Seeking software engineering internship to build impactful, scalable technologies.

Education

Drexel University Bachelor of Science in Computer Science, Minor in Business Analytics | Philadelphia, PA

Expected Graduation: June 2027

Universitat Pompeu Fabra Barcelona Program for Interdisciplinary Studies, Escola d'Enginyeria | Barcelona, Spain

January 2025 – March 2025

Skills

Programming Languages Python, C/C++, Java, C#, JavaScript, TypeScript, R, Markdown, Dart, Rust, Swift, SQL

Tools & Frameworks VSCode, IntelliJ, PyCharm, Git, Node.js, React, Expo, Jupyter, Makefile, Flutter, SwiftUI, Jira, Lucid

Cloud & DevOps AWS (ECS, S3, Lambda, Fargate, ALB, SQS, SES, CloudWatch, CloudFormation, Bedrock), Cloudflare Workers, Docker, Databricks, GitHub Actions, CI/CD, Infrastructure as Code (IaC)

AI & Agentic Tools Claude Code, MCP, PyTorch, OpenAI API, LangChain, TensorFlow

Work Experience

Cloud Developer Co-op Bristol Myers Squibb | Princeton, NJ

April 2026 – September 2026

- Simplified infrastructure provisioning across 75+ Cloud team projects by building a full stack, agentic GitHub template repo (Python, CloudFormation, Databricks/JWT authorization), that automates AWS Fargate/ALB deployment, abstracting away AWS complexity so developers could focus solely on code, cutting deployment time by 4 months.
- Reduced alert noise across 500+ AWS accounts by architecting a Lambda-based classification pipeline that intercepts SQS messages, routing informational alerts to a dashboard and critical alerts to an email digest via SES.
- Onboarded 100+ new employees by building an AI chatbot powered by MDBase, BMS's internal MCP knowledge base, that answers user questions and explains cloud operations in real time, replacing static documentation with interactive, context-aware support.
- Automated project governance across 20+ projects by building a requirements-driven Claude skill that parses spec docs into Jira-ready user stories and epics, with a digest of available tasks, functioning as a virtual project manager.

Software Development Engineering Co-op Epiq Solutions | Mount Airy, MD

April 2024 – September 2024

- Programmed JSON interfaces for software defined radios in Python, adhering to DevOps practices to improve code performance by 15%
- Built unified VITA49 packet parser libraries for 32-bit SDR architectures using Test Driven Development (TDD), improving production testing efficiency by 20%
- Designed Linux user interfaces in Python for test stations using PyQt and Matplotlib modules to streamline production testing procedures
- Tested 200+ digital, tuner and reference modules in SDRs for appropriate phase noise and power distribution, hitting quality assurance targets

Software Development Intern EV Buddy, Inc | Edison, NJ

June 2023 – September 2023

- Researched EV charging protocols (CCS, CHAdeMO) and developed technical specifications for vehicle-to-vehicle charging solution, informing prototype architecture
- Programmed sniffer data parsing software in C++ and Python to analyze EV charging protocols, improving success of prototype by 45%
- Used OpenEVSE Arduino embedded system to build a prototype architecture that interfaced with RS485 and CAN protocols used in EVs
- Designed UX flows (50+ Figma iterations) for a social app targeting EV owners to enable them to troubleshoot issues or provide assistance

Projects

Janata Chinmaya Mission | Remote

August 2025 – August 2026

Build a cross-platform social app (Expo, React Native, Cloudflare Workers) for Chinmaya Mission's youth wing using Claude Code-driven agentic workflows, helping members discover events, volunteer opportunities, and connect through community boards.

CrashMath College of Computing and Informatics | Philadelphia, PA

September 2022 – June 2023

Led development of a gamified calculus learning platform (Firebase, JavaScript, OpenAI API) that leverages intelligent tutoring chatbot to provide personalized problem-solving assistance.

Honors and Awards

A.J. Drexel Scholarship September 2022 – Present

Dean's List Recognition September 2022 – December 2022
